

# Helping Care Homes with Deep Clean

## Our initiative to help Care & Nursing Homes ensure effective deep clean implementation to keep environments safe

We are very aware of the continuing challenges Nursing and Care Homes face in this pandemic and how short many have been of adequate PPE, sanitisers for deep cleaning and infection control training and support for the necessary procedures to contain the virus.

To help address some of these continued challenges care homes face and ensure correct deep clean protocols and implementation, we are looking to offer support in 3 ways.

1. Providing FREE SoChlor DST Tablets and SoChlor Diluters
2. Providing FREE Infection Control Support in form of guides and on-hand help via online or via phone
3. Providing FREE additional Polycare Aprons for Deep Clean Implementation

The initiative is to provide a gift for a Care Home of 1,000 disposable Polycare Aprons and 400 Chlorine Detergent Sanitiser Tablets (DST) with diluter. The 400 DST tablets can be used to create 400 litres of 1,000ppm detergent and sanitising solution for "deep-cleaning" against coronavirus as recommended by Public Health England guidelines.

The offer is completely free, without obligation of any sort. We hope this initiative will go some way in providing support for the ongoing infection control challenges care homes face.

To apply, send your details to [info@gvhealth.com](mailto:info@gvhealth.com) or call us on 01920 463 098.

<sup>1</sup>Includes free delivery within the UK mainland. Offer available on a "first come, first served" basis, up to set allocation. Applicable to nursing or care homes only. Please include your name, position, the home name, full address and post code and a contact phone number. Limited to one offer per nursing or care home organisation. Offer limited to UK addresses only.

Offer available to 30/04/2021.
