

70% IPA Wipes

Surface and Hand Sanitizer Wipes

PRODUCT DESCRIPTION

GV Health alcohol wipes with 70% Isopropanol (IPA) for hand sanitizing and disinfection of surfaces, medical and other general devices. 70% alcohol is a proven disinfectant, providing an effective kill against a broad spectrum including; vegetative bacteria, MRSA, ESBLs, VRE, E. coli, Enterococcus, Pseudomonas and Acinetobacter, with a short contact time. 70% alcohol Fast acting alcohol kills 99,999% of germs on contact.

These individually wrapped multipurpose wipes are impregnated with 70% isopropyl alcohol (also known as IPA, isopropanol or Propan-2-ol) and 30% Deionized Water. Designed for a variety of surfaces and equipment including mattresses, bed frames, keyboards and computer screens.

KEY FEATURES

- Effective kill against a broad spectrum including; vegetative bacteria, MRSA, ESBLs, VRE, E. coli, Enterococcus, Pseudomonas and Acinetobacter, with a short contact time.
- Evaporates quickly leaving no residue.
- Each wipe is individually packaged in a sachet measuring 60mm x 80mm containing a single low linting wipe measuring 185mm x 145mm.
- Product is labelled in accordance with the Classification Labelling and Packaging Regulation EC (no) 1272/2008.

CORONAVIRUS: DEVICES & HANDS

Coronavirus (COVID-19) can remain on contaminated plastic and stainless surfaces for up to 72 hours. This includes your smartphone and other devices. So the aim should be to increase the frequency of clean/disinfect of commonly used hand-touched surfaces.

Use 70% IPA wipes for items you are in contact with regularly such as mobile phones, tablets, laptops, PC mice/keyboards etc.
